

WRBV301 End of Semester Assessment - 2026

Task

This report will be the final assessment and will allow you to review the process of applying relevant concepts covered throughout the semester to real businesses or industries. This must be an **INDIVIDUAL** report. That is, each student must write and submit their own report.

The report must contain the sections outlined in this document and the Module Assessment Guide, and be written in clear, straightforward academic English. It must include a reference list for the sources you consulted.

The report will make up **40%** of your final mark.

To Do

1. Select two relevant businesses or industries (e.g., Airbnb, the airline industry, Takealot). Research the case by visiting their website or reading articles about the business/industry online.
2. Choose two topics or key concepts **EACH** covered in class that you believe are particularly relevant to the chosen two businesses/industries.
Options could be, but are not restricted to:
 - Competitive Advantage
 - Technology as a strategic enabler
 - Branding
 - Social media
 - Network effects.
3. For each of your selected two topics/key concepts, you will be required to write a brief explanation of the topic or key concept and then explain how it is relevant to the chosen businesses/industries. You should discuss **FOUR** topics or key concepts in total; two per chosen business/industry.
4. Submit your report to the EMA submission folder on Funda by **Friday, 29 May at 5 pm**.
5. The structure of the report and how it will be assessed are explained below:

Report Structure and Assessment

Structure

The structure component relates to the overall organisation and presentation of the report. This includes adherence to the required format and instructions, logical arrangement of sections, appropriate use of headings, and the overall coherence and flow of the submission as a complete document.

The report must contain the following sections:

Introduction

Introduce the businesses/industries and topics/key concepts you will write about, and provide a brief overview of the report's content.

Review of two topics/key concepts for each of the chosen two businesses/industries

Discuss each topic/key concept that you consider relevant to your businesses/industries.

Your discussion should demonstrate a clear understanding of the theory (concept) and explain how you perceive it as relevant to your business/industry. This should be a critical analysis, that is, a discussion that explains the concepts and presents your viewpoint on how it relates to the businesses/industries. Explain the selected concepts clearly and apply them to the two selected businesses or industries. This includes discussing relevant opportunities, benefits, limitations, risks, or challenges associated with the concept, and demonstrating analytical engagement beyond mere descriptive explanation. Since the task requires two topics/key concepts per business or industry, the discussion is expected to cover four concept applications in total.

Reflection

Write a brief description of your experience of applying the topics/key concepts to actual businesses/industries, and a reflection on how theories have been used in case studies throughout the semester. This could include what you found easy to do, what was problematic, what you have learned, and suggestions for improvement (both in process and content).

Citation and References

The report must contain appropriate in-text citations and a list of references. Turnitin submission will be used. Make sure your **similarity index is below 10%**. **The generative AI index should also be below 30% and be cited in your references; however, this aspect will be assessed on a case-by-case basis.** You will be penalised if you do not cite correctly.

Length of Report

The report's length will depend on the information you decide to include and how you discuss each topic. However, the lower limit should be 1500 words, excluding appendices and references. Upper Limit should be 2500 words excluding appendices and references. Aim for 3 – 5 pages excluding references.

Style

The style component relates to the quality of academic writing and presentation. This includes clarity of expression, logical flow of ideas, appropriateness of language and tone, grammar and spelling, use of the student's own words, and correct in-text citation and referencing practices

The report must be written in simple, academic English:

NELSON MANDELA

UNIVERSITY

- correct grammar and spelling.
- no use of slang, contractions and informal language.
- straightforward, direct language.
- your own words.
- any quotes and references must be cited and referenced.

Format

The exact styles and format are your own choice, but they should be academically acceptable. For example:

Font: Arial or Times New Roman

Font Size: 11 or 12

Line Spacing 1.5 or single

Alignment: Justified

Ensure you include the following elements:

- an accurate title;
- a header containing your name;
- proper headings for each section of the report;
- page numbering;
- in-text citations for definitions, statistics or information from other sources;
- and a reference list if you have referenced other people's work.

Assessment Rubric

The overall mark for the report is 40.

Structure	Overall structure meets requirements	10%
Content • Explanation of key concepts/theories • Ability to apply key concepts to the chosen business/industry • Critical discussion of challenges and opportunities	Introduction Main content (3 topics) Reflection	5% 60% 15% 80%
Style • Well structured with a logical flow of argument. • Appropriateness of style and language • Correct grammar and spelling; straightforward direct language; your own words; any quotes and references must be cited and referenced	In-text citation List of references	10%
TOTAL		100%
